### TECHNICAL SKILLS

- Javascript
- React
- Redux
- Node.js
- PostgreSQL
- Express
- CSS3
- HTML5
- Sass
- Git

### EDUCATION & TRAINING

#### DevMountain

*Web Development*

- November 2018 - February 2019

#### University of North Texas

*Bachelor of Fine Arts in Studio Art*

- August 2008 - December 2011

### WORK EXPERIENCE

#### Clear C2

*Front End Software Developer | May 2019 - Present*

- Developed features for large scale applications using Javascript, React, and Redux
- Worked on multiple teams simultaneously for in-house and contract applications
- Led the development of a small application for Verizon
- Integrate front end features with RESTful APIs

#### Gynx Yarns

*Owner, Artist | April 2011 - October 2018*

- Designed and dyed custom yarn for both yarn shops and individual clients
- Communicated directly with clients to plan projects and assist in color selection
- Utilized time management skills to set my own schedule

### RECENT PROJECTS

#### ALL.4.G. February 2019

[github.com/gamers-unite/All-4-G](https://github.com/gamers-unite/All-4-G)

**Technologies Used:** React, Javascript, Socket.io, Node.js, Redux, Express, PostgreSQL, MaterialUI, Firebase Storage

#### Description:

- A group project built for gamers to connect with others online and form parties for specific games
- Created the login and register components and handled authentication
- Built out the backend and set up database tables
- Self taught React hooks, which were then used in almost every component in the app

#### FosterPet January 2019

[fosterpet.us](https://fosterpet.us) | <https://github.com/laurajinks/foster-pet>

**Technologies Used:** React, Javascript, Node.js, Redux, Express, PostgreSQL, Sass, Firebase Storage

#### Description:

- A personal project built to connect foster organizations and volunteers
- Created both organization and individual accounts, using bcryptjs for authentication
- Connected the Petfinder API to pull lists of adoptable animals
- Made fully mobile-responsive using Sass
